## MARANTZ DESIGN AND SERVICE

Using superior design and selected high grade components, MARANTZ Company has created the ultimate in stereo sound. Only original MARANTZ parts can insure that your MARANTZ product will continue to perform to the specifications for which it is famous.

Parts for your MARANTZ stereo are generally available within 72 hours throughout the nation via a toll-free line to our National Parts Depot in California. The sales professionals who take your call immediately refer to their own desk top computer terminal and can quickly determine the availability and price information you require. If, for some reason, your order should exceed our available stock, we usually can instantly provide an alternate replacement part or current delivery information. When the order is placed and confirmed, the computer simultaneously generates "hard copy" orders at the distribution center. As hard copies come directly from the computer to the national parts depot, your requested stock is assembled and prepared for shipment and placed on the first available carrier for delivery to you.

### ORDERING PARTS

Phone orders will eliminate mail delays, and we encourage the use of this method. If you order by mail, use MARANTZ parts order forms which are available from our National Parts Depot located at the following address:

SUPERSCOPE NATIONAL PARTS DEPARTMENT  
20525 Nordhoff Street  
Chatsworth, California 91311  
Phone: 1-800-423-5108  
1-213-998-9333

The following information must be supplied to eliminate delays in processing your order:

1. Complete address.
2. Complete part numbers.
3. Complete description of parts.
4. Model number for which part is required (indicate MARANTZ).
5. Account number (for account customers only).

Direct consumers will be provided with the current retail price quotation on available parts in order to advise them of the cost of the parts and shipping.

### OVERSEAS PARTS ORDERING

Parts may also be ordered from the following overseas addresses:

#### CANADA

Superscope Canada, Ltd.  
3710 Nashua Drive  
Mississauga  
Ontario, Canada L4V1M5

#### AUSTRALIA

Superscope (Australasia) Pty., Ltd.  
32 Cross Street (P.O. Box 604)  
Brookvale 2100 N.S.W.  
Australia

#### JAPAN

Marantz Japan, Inc.  
3622 Kamitsuruma  
Sagamihara Shi  
Kanagawa, Japan

#### EUROPE

Superscope Europe, S.A.  
Avenue Leopold III, 2  
7120 Perennes-Lez-Binche  
Belgium

Marantz France  
Rue Louis Armand 9  
92600 Asnieres  
Hauts-de-Seine  
France

Marantz Audio U.K. Ltd  
London Road, 203  
Staines  
Middlesex  
England

Superscope GmbH  
Max-Planck-Strasse 22  
D-6072 Dreieich 1  
West Germany

All of the above locations are fully equipped to take care of your total service needs. Because various countries have differing configuration requirements, it is necessary that you contact the service facility in your particular country. In the event that there is no service location listed for your country, please contact the nearest facility for the necessary assistance.

## SECTION 2. ALIGNMENT-ADJUSTMENTS

This service manual was prepared for qualified technicians familiar with Turntable maintenance and alignment procedure. Review complete adjustment sections before proceeding.

### Cartridge Wire Color Code

Before installing a cartridge to the headshell, the wires should be connected to the cartridge. The cartridge or its technical sheet will identify the connection pins. It may be necessary to slightly compress the terminal clips on the headshell wires with your fingers to firm the contact area to the pins. Below is the headshell color-description.

#### Headshell Wires:

Right Channel Hot. . . . . Red  
Right Channel Ground . . . . . Green  
Left Channel Hot . . . . . White  
Left Channel Ground . . . . . Blue

After wire connections are made, install cartridge mounting screws, provided with the cartridge, through the mounting slots and tighten firmly enough to hold the cartridge in place. Final adjustments are made after the overhang dimension is adjusted.

#### A. Stylus overhang adjustment

A 45 RPM adaptor is supplied with the TT2000 turntable that will be used for adjusting the overhang dimension. An arrow is marked on the 45 RPM ADAPTOR, and a gradient scale from 11 through 18.

1. Place the adaptor on the spindle with the arrow pointing towards the rear of the turntable. Gradient scale will be in the lower half quadrant when viewed from the front.
2. Remove stylus protective cover and balance the tone arm. Place the tone arm to the gradient scale and set stylus contact to gradient 17 mm on the 45 RPM ADAPTOR. Set the cartridge screws after checking that the cartridge is parallel to the sides of the headshell.

#### B. Stylus tracking force adjustment

1. Remove stylus protective cover. Adjust the counterweight until tone arm is capable of being suspended in midair without movement.
2. Set the counterweight dial to zero.
3. Rotate the counterweight towards the pivot point to the manufacturers specified cartridge tracking force.
4. Adjust the anti-skate control to the same force as the stylus tracking force.

#### C. Pitch—verification

1. Verify that the platter pitch control can be adjusted nominally from  $\pm 3.5\%$  in both 45 and 33.3 RPM Modes.

2. Monitor that pitch control stabilizes Dot Patterns on the Platter. If adjustment is necessary, proceed to trouble shooting chart pitch adjustments.

#### D. Auto-return adjustment

If the Tone Arm returns before the end of the record program or delays to lift at end of record program, the sending arm can be adjusted as follows. REFER TO FIGURE (1)

1. To slightly delay tone arm return, adjust the fine adjustment screw clockwise.
2. To slightly advance tone arm return, adjust the fine adjustment screw counter clockwise.
3. When larger deviations are necessary, return fine adjustment screw to the middle of its travel.
4. Loosen the sending arm securing screws and adjust the tolerance between the actuating arm and sending-arm assy to 7 mm (.276in.). FIGURE (1)
5. Fine adjust tone arm return by repeating steps one or two, where applicable.

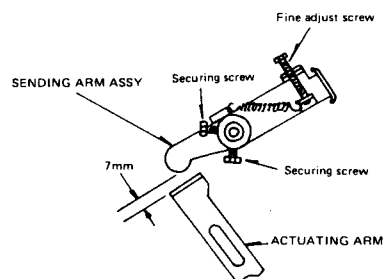

FIGURE (1)

## SECTION 3. MOTOR REPLACEMENT PROCEDURE

1. Remove lead wires connected to pins 4,7-15
2. Remove the motor retaining screws on top of the turntable unit.
3. Remove the motor grounding wire.
4. Guide motor out of the unit

Reverse procedure for motor installation (Refer to FIGURE 2 for adjustment)

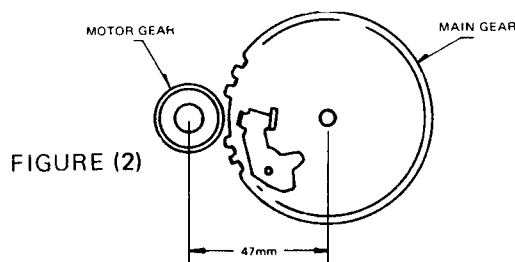

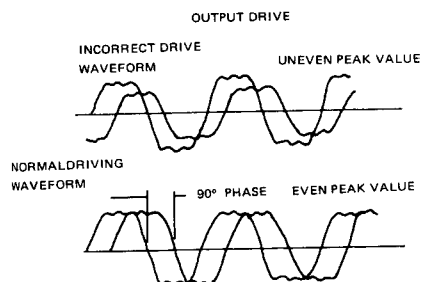

FIGURE (2)

1. Adjust Motor Pulley Distance from main gear (center to center) to 47 mm (1.850 in)
2. Adjust Motor gear to the center of main gear notch. (FIGURE 2)

### Driving Waveform Adjustment

Adjusting resistors VR3, VR4, VR5 establishes IC2 operational offset and determines the hall element unbalanced output voltage. Below is a typical driving waveform output appearing at X6-B and X7-B.

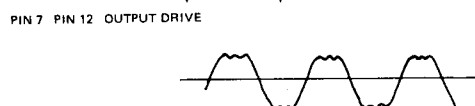

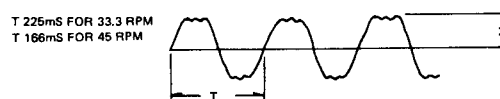

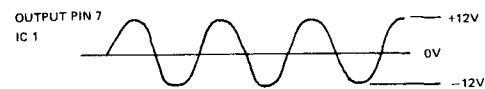

1. Use a dual beam scope with probes connected to X6-Base and X7-Base.
2. Superimpose signals from both channels on the scope.
3. Determine peak values and phase shift.

- a. If peak values are uneven, adjust VR3.
- b. If phase is not 90° adjust VR4, VR5.

**NOTE:** Repeat several times as one adjustment will affect the other.

4. Connect a wow and flutter meter and fine adjust VR3, VR4, VR5 for minimum wow and flutter starting with VR3.

**NOTE:** Turntable must be level for correct wow and flutter measurements.

### INTEGRATED CIRCUITS

PIN NUMBER	IC1	IC2
1	0.8V	0V
2	0.2V	0.15V
3	0.2V	0.15V
4	-12.0V	-12.0V
5	0V	0.15V
6	0V	0.15V
7	0V	0.2V
8	+12.0V	+12.0V

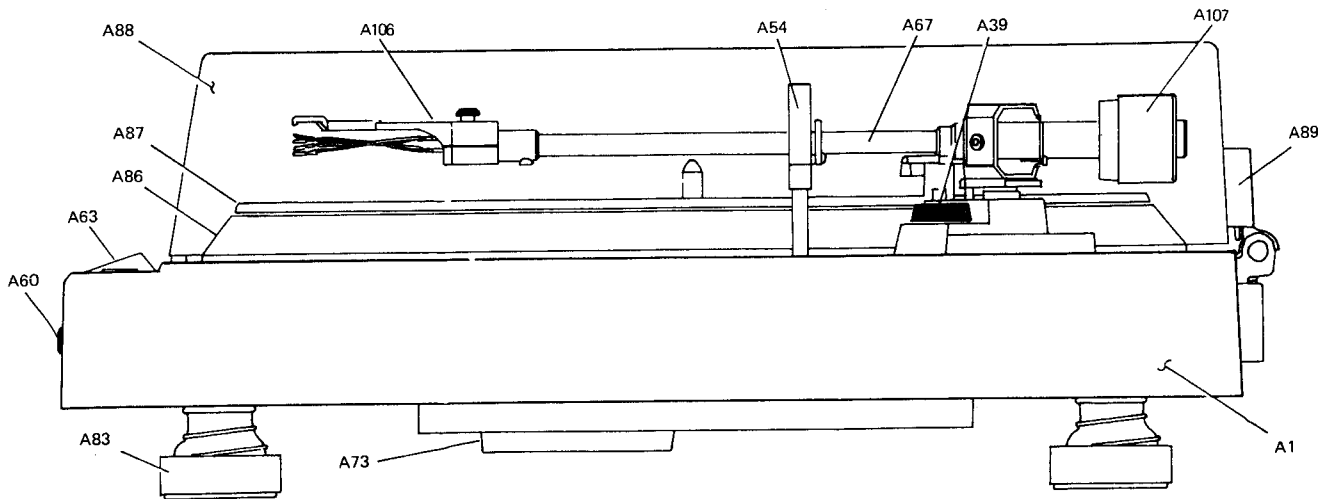

### TRANSISTORS

COMPONENT	EMITTER	BASE	COLLECTOR
X1	0V	0.9V	3.5V
X2	0V	0V	1.5V
X3	2.1V	1.4V	6.2V
X4	6.4V	6.8V	0.25V
X5	2.0V	2.5V	6.4V
X6 X7	0V	0.3V	+2.0V
X8 X9	0V	0.3V	-1 2.0V

**TT-2000**  
**TECHNICAL SPECIFICATIONS**  
**GENERAL**

TYPE: Auto-return, direct drive system  
 FEATURES: Semi-automatic with strobe  
 POWER SOURCE 120V-60Hz 5 Watts Max.  
 DIMENSIONS 446(W) x 394(D) x 142(H) mm  
 PLATTER DIMENSIONS—WEIGHT: 320 mm—1.1KG  
 NET WEIGHT: 9KG Max.

**MOTOR SPECIFICATIONS:**

TYPE: Coreless, slotless, brushless  
 2 Phase 8-Pole Magnetic Field DC Servo  
 SPEED CONTROL RANGE;  $\pm 3.5\%$

WOW-FLUTTER (WRMS)	NOMINAL 0.030%	LIMIT 0.080%
RUMBLE (DIN B)	-72dB	-60dB
<b>TONE ARM:</b>		
EFFECTIVE LENGTH:	216 $\pm$ 2MM	
OVERHANG:	17MM	
OFF SET ANGLE:	23.5°	
TRACKING FORCE RANGE:	1.5-5 GRAMS	
ADAPTABLE CARTRIDGE WEIGHT:	5-10 GRAMS	
ANTI-SKATING FORCE RANGE:	0-4 GRAMS (CONICAL-ELLIPTICAL)	

**PACKING ASSEMBLY**

**NOTE:**

1. This merchandise was thoroughly packed and inspected before leaving our factory. Responsibility for its safe delivery was assumed by the carrier upon acceptance of the shipment. Claims for loss or concealed damage, sustained in transit, must therefore be made upon the carrier. Forms required to file such claims will be supplied by the carrier.
2. Replacement parts may be ordered from the Marantz Parts Department, 20525 NORDHOFF STREET, CHATSWORTH, CA. 91311. ITEMS Such as screws and other hardware may be obtained locally, using the description provided.

When ordering replacement parts, specify model number, part number and description.

For telephone orders, dial: 1-800-423-5108 (toll free)  
 1-213-998-9333 (California or direct)
